

# Vienna Download Manager

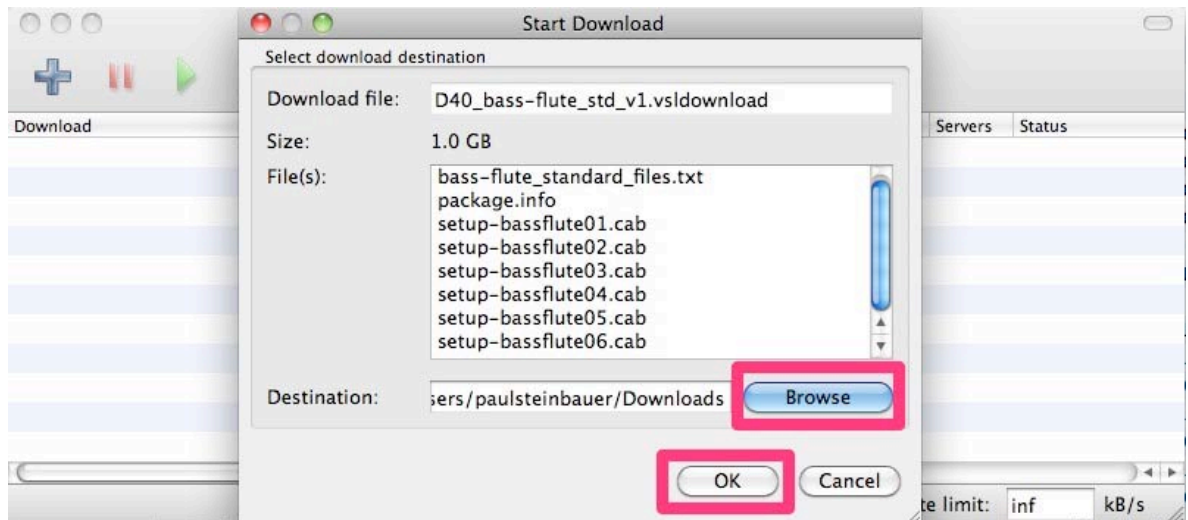

## for Vienna Download Products

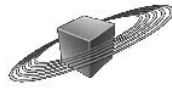

1

### Quick Guide

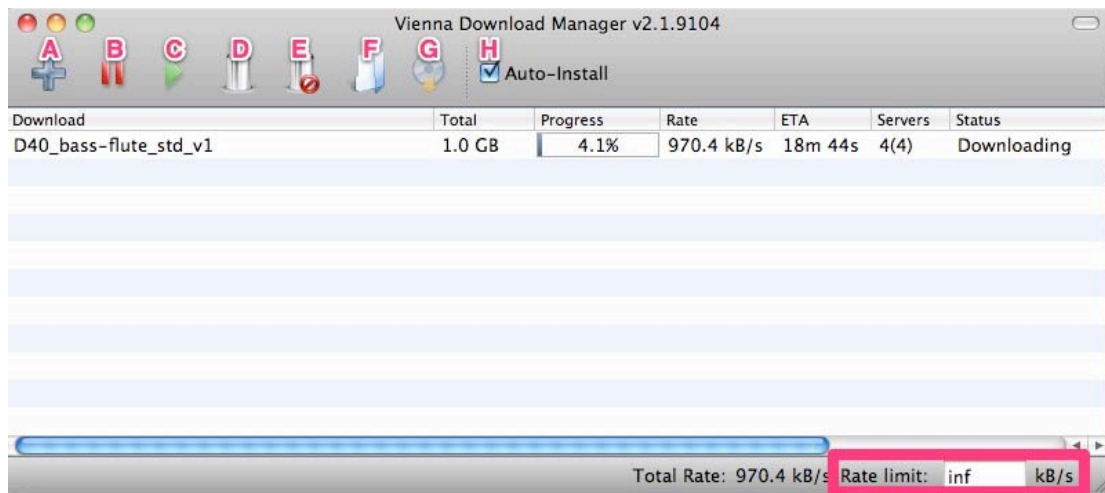

The *Vienna Download Manager* offers a convenient and safe way to download and install the sound files of our *Download Products*.

1. Download and install the latest version of [eLicenser Control Center](#) and your [Vienna Software](#).
2. Make sure that you have the latest version of the *Vienna Download Manager* installed. It is available for download as a separate application in your [USER AREA](#) (next to this manual).
3. Download the VSL Download file **\*.vsldownload** for your Download Product and double-click it. This will open the *Vienna Download Manager*. Select the download destination of the installation files by clicking on **Browse**. Click **OK** to start the download.

- The *Vienna Download Manager* will initiate the download of the sound files. You can monitor the download progress and you can manipulate the download rate, if you wish.

2

**A:** Add a \*.vsldownload file. You can also drag and drop the file on the Download Manager.

**B:** Pause Download

**C:** Start Download

**D:** Remove Download: Removes your download from the list in the Download Manager

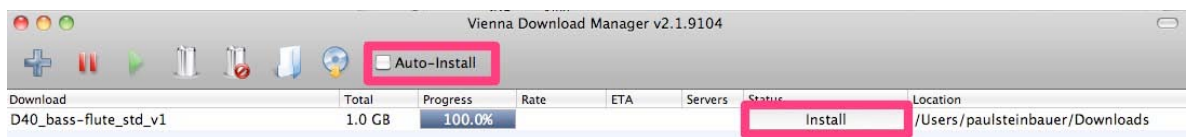

**E:** Remove Download and Data: Removes all data produced by the downloaded files.

**F:** Open Containing Folder: Opens the destination folder for each Download Product.

**G:** Install the selected Download Product: Launches the Library Installer.

**H:** Activate Auto-Install to launch the Library Installer automatically after the download is finished. Note that the key with the permanent license for your Vienna Download Product has to be connected for installation.

If you didn't activate Auto-Install: After the download is complete, click on **Install** in the *Vienna Download Manager*. This will launch the *Vienna Instruments Library Installer*.

- After the installation process is completed, you will be asked whether you'd like to delete the downloaded data. This will of course only delete the installation files, not your sample content. Your Download Product Sound Files will stay available for download in your User Area in any case!

### **In case your music computer is not connected to the internet:**

You can also use the *Vienna Download Manager* to download the sound files on any internet computer. Once the download is complete, copy the downloaded installation files (in this case the folder **D40\_bass-flute\_std\_v1**, located in your chosen Destination folder) to your music computer and launch the Vienna Instruments Library Installer manually.

Point the Library Installer to the **package.info** file contained in the downloaded installation files and you will be guided through the installation process.

## **eLicenser Control Center**

The eLicenser Control Center manages your licenses, latest updates are available at [www.elicenser.net](http://www.elicenser.net). We have sent an **Activation Code** to your registered email address right after your purchase in the VSL webshop.

If you have purchased your Download Product in another webshop: Simply register your Download Product in your [User Area](#) and we will send your **Activation Code** right away.

**Downloading your permanent license** is simple: Make sure your **ViennaKey** is inserted, launch **eLicenser Control Center (eLCC)**, click on **Enter Activation Code** and paste your Activation Code into the respective field. You will be guided through the rest of the procedure.

An Internet connection has to be available for this process. You can of course download your license on any Internet computer, in case your music computer is not connected to the Internet.

**Attention: The eLCC has to be installed and your ViennaKey inserted into a free USB slot before you can install and run your Vienna Download Products.**

---

## **Multiple Computer Setups**

If you are using more than one computer for your composing setup, you can distribute your licenses for different products onto several ViennaKeys following the instructions of the eLicenser Control Center utility. Please ask your dealer for additional ViennaKeys – you will need one for every computer you want to run your Vienna Download Products on.

Please feel free to contact us at [support@vsl.co.at](mailto:support@vsl.co.at) if you have any questions!
